

## Help with Zoom

To join the meeting you will need to download the Zoom app to your device, which is a quick process. You will need the "Zoom Client for Meetings" download in the menu on the below page.

<https://zoom.us/download>

We recommend setting up your device at least an hour before the meeting, so that you can troubleshoot any issues. If you do get into difficulties, the quickest way to resolve them will be here:

<https://support.zoom.us/hc/en-us>

Whilst you can attend this meeting on your smartphone, the experience is much better on a laptop or tablet. These larger devices give you space to see the attendees, the slides and the chat box. So ideally please join on a laptop or tablet.

Ideally you will have a video camera, microphone and speakers, so that you can engage fully in the meeting should you wish. You are under no obligation to have your video on, so if you do not have a webcam or prefer not to turn on your video, that's fine. You will however need a microphone and speakers to contribute to the meeting.
